

FINAL PROJECT AND CERTIFICATION OF GROWIA

Halo Students, welcome to Growia's SQL final project, It will be fun and make you more confident in the Software Testing field. Please follow the instructions below.

Instructions

STEP 1: Open the following URL <https://www.programiz.com/sql/online-compiler/>

STEP 2: Solve the problems given under the Task sections

STEP 3: Take a screenshot and query you used and put them together in a doc/slides file to be presented.

Problems

Create a query resulting in the following data:

- Shows all Customers who are older than 25 years old. Output should be as follows:

customer_id	first_name	last_name	age	country
1	John	Doe	31	USA
5	Betty	Doe	28	UAE

- Shows the data for all Delivered shipments. Output should be as follows:

shipping_id	status	customer
3	Delivered	3
5	Delivered	1

- Shows the records from the Orders table that were made by John Doe. Output should be as follows:

first_name	last_name	order_id	item	amount
John	Doe	4	Keyboard	400

4. Shows the Customers first name and last name who made an order more than or equal to 400. Output should be as follows:

first_name	last_name
John	Reinhardt
David	Robinson
John	Doe

Deliverables

1. Doc/Presentation slides

Good Luck!
